

ABSTRACT

Android Smartphone are in hype in the 21st century. The scope of android application is increasing day by day. Its development has become an essential part of today's programming curriculum. The project Film is an android app that incorporates everything from UI design to database. Its utility and efficiency are also very high. The society has death of ideas. These ideas can be most effectively implemented by developing user-friendly android applications. Through this internship, I got to learn a lot. Being new to app development, I came to know a lot about developing an android application from scratch. The Film industry has undergone a lot of changes in the last few decades. Be it technology, production, film marketing or distribution. It is a common sight to see so many talented, sincere, and passionate talents who struggle to find a foothold in the industry. And even giving up on their careers because they think that it is unsustainable to have a future in the film industry. It is a challenge to reach out to their target audience, get their attention, and keep them entertained with their movie. The audience would instead prefer to be entertained by a known name than a rank newcomer. It's not just the audience but also the film industry which doesn't readily accept aspiring filmmakers - be it directors, or actors. This app is very useful for those who are seeking for the talents and those who have talents. They will get to know about the opportunities available in film industry.

ACKNOWLEDGMENT

I wish to express my sincere gratitude to **Mr. Naveen Kumar K.C**, Director-Business Development of Hornbill Softech Pvt Ltd., Bangalore for giving us the opportunity to do Internship at highly esteemed organization.

I am grateful to **Mr. Gowtham K M**, of Android Department for his valuable guidance, encouragement, suggestion and advice to me at every stage.

I take this opportunity to acknowledge my profound gratitude to Principal **Dr. Kataiah G S**, MIT, Kundapura, for his support and guidance provided during my study in this institution.

I sincerely thank **Mr. Melwin D'Souza**, Asst. Professor (Sr.) and Head, Department of Computer Science and Engineering MIT, Kundapura, for his suggestions and support for the completion of the internship.

I sincerely thank **Mr. Dhruva P Achar**, Asst. Professor, Dept of Computer Science and Engineering, MIT, Kundapura for his suggestions and support for the completion of the internship.

I am grateful to my **parents, teaching and non-teaching staff** for their constant support and guidance either directly or indirectly towards completion of my internship.

Venu A.S (4MK16CS035)
